

# FULL MOON WREATH

1. Gather your supplies: an embroidery hoop, wreath hanger, string, white felt, white construction paper, spider webbing, bat wall decals, a battery-operated string of lights, tape, scissors, white paint, black paint, a paintbrush, glue, a sponge and black foam core.

2. Detach the two parts of the embroidery ring.

3. Paint the outside ring white. Paint the top part of the embroidery hoop black. Allow both pieces to dry completely.

4. Using the smaller ring, trace the outside of the circle onto black foam core and cut this out.

5. Tape the foam core circle to the smaller embroidery ring.

6. Using the battery-powered lights, strategically tape them to the inside of the foam core. The battery pack should be closer to the outside edge of the embroidery hoop.

7. Locate the on and off switches on the battery-powered lights, then cut small squares through the black foam core so that you can easily turn the lights on or off without needing to deconstruct the wreath.

8. Add a thin layer of webbing to the inside of the foam core on top of the lights.

9. Cut out a piece of white felt fabric that is the same size as the larger embroidery ring, leaving extra fabric at the edges. Insert the smaller hoop into the larger hoop, closing the fabric tight.

10. Trim the extra fabric around the edges.

11. Mix the black and white paint until it is gray. Then, sponge the gray paint onto the felt in varying spots so that it looks like a moon.

12. Cut out cloud shapes from the white construction paper.

13. Tape the remaining spider webbing onto the paper to create the clouds.

14. Tape or glue the clouds onto the moon wreath.

15. Add a string loop to the top, then place it onto the wreath hanger. Add bat decals using tape or glue.

16. When the sun goes down, turn the lights on inside your full moon wreath and prepare to hear the werewolves howl. #HalloweenHills
