

## Caring For Your Smith & Hawken® Tools

### **ABOUT YOUR SMITH & HAWKEN BRITISH-MADE TOOLS**

Made by skilled craftsmen in England, each tool is designed to ensure maximum strength and durability through years of use. The combination of solid blades, weld-less sockets and ash wood handles make these tools superior in design, quality and craftsmanship. They're truly an ode to the heritage of gardening and outdoor living.

### **CARING FOR YOUR TOOLS**

After use, always clean the tool(s) with a lightly oiled cloth to remove any dirt. Doing so will allow the tool(s) to remain looking new.

Avoid using a damp cloth as this could lead to corrosion.

Keep tool(s) in a dry, cool area and always store them standing up, preferably in a tool rack.

Do not make modifications to the tool(s) as this may result in possible damage and will invalidate your warranty.
