

HIGH ELF GOBLETS

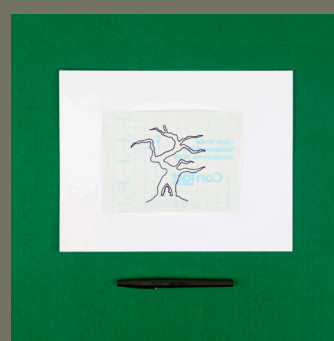

1. Gather your supplies: paper, scissors, contact paper, tape, a thicker black pen, a wine glass and frosted window spray paint.

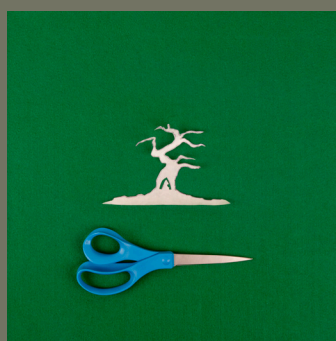

2. Design your tree and draw it onto a piece of white paper in black pen. The tree should fit the size of the glass.

3. Place a square of contact paper on top of the tree design, and tape the contact paper so that it stays in place.

4. Trace the tree design onto the contact paper.

5. Use the scissors to cut out the tree design from the contact paper.

6. Peel off the back layer from the contact paper and strategically place the tree onto the wine glass. Repeat steps 2 through 6 until as many trees as you'd like cover the entire glass.

7. Prepare a space outdoors, and then spray the glass with the frosted glass spray paint. Be careful not to get any on the stem. Use a cloth to cover the stem if need be. Allow the paint to dry completely. Once the paint has dried, peel off the contact paper trees to reveal the design underneath.

8. Fill the glass with liquid and watch as the trees magically appear.

9. To create a glass with the inverse space illuminated and the trees frosted, repeat steps 2 through 9 and cut out the space around the tree instead.

10. When the inverse glass is filled with liquid, the background setting will illuminate.

11. Treat yourself like a High Elf tonight and drink from these gorgeous goblets that are easy to make, and even easier to love. #HalloweenHills
