

# MUTANT MINI-GOURDS

1. Gather your supplies: mini-gourds, super glue, black frosting, fake teeth, various Halloween gummy candy (for eyes, ears, and mouths), pumpkin carving tools, toothpicks and a pen.

2. Pick out your oddly shaped mini-gourds.

3. Measure the size of the fake teeth, and draw a similarly sized crescent shape onto the mini-gourds.

4. Cut out the crescent shape, careful not to make it too deep into the gourd.

5. Insert the fake teeth into the crescent shaped hole.

6. Select the gummy candy eyes and insert them into the mini-gourd using toothpicks.

7. For a variation, use another mini-gourd and use a flatter pair of teeth.

8. Using super glue, attach the fake teeth to the outside of the mini-gourd. No carving is necessary for this method.

9. Attach a different pair of gummy eyes using super glue.

10. With mutant mini-gourds as deliriously simple as these around your house, this year's Halloween decorating contest is bound to be a no-brainer. #HalloweenHills
